Assessment Summary

General Summary

Learning Styles

Your primary learning styles are Social, Solitary, and Visual

Comparison To National Averages

The national average represents the average of all students from all schools who have taken this version of the assessment. These national averages are automatically updated monthly.

Life Factors

Many students strongly desire to continue their education. However, often other situations in life prevent them from being able to do so. The Life Factors section of this assessment asks questions about other elements in your life that may impact your ability to continue your education. The section measures five items: Time, Place, Reason, Resources, and Skills.

You may be able to modify circumstances which impact some of these life skills. If so, you are encouraged to take appropriate action to help yourself succeed. But some of the circumstances in life may be beyond your control. If this is the case, being aware of these realities and planning accordingly may be beneficial for you.

The maximum possible score for this section is 100%. You scored a total of 86%. Your results for each of the five areas are below.

Detailed Item Results

4

Time

The amount of time you have available to participate in activities related to your school work is **not really a concern for you**. Consider yourself fortunate that you have ample time to devote to school work. However, you may need to plan for and budget your time so that you are giving due diligence to school work. Avoid activities like social networking which research has shown can easily consume too much time and distract you from studying.

A generally accepted rule of thumb for time spent with college classes is that you should expect to study about 2 to 3 hours per week for each unit of credit in a typical 16 week class. Based on this rule of thumb, a student taking 15 credit hours should expect to spend 30 to 45 hours each week with school work. Realize that this is similar to the time required of a typical job. Continuing your education requires a substantial investment of time. Of course, if you are working while you attend school, you will need to budget your time carefully. As a rough guideline, your studying time might be divided as follows.

If your course is	time for reading the assigned text (per week)	time for homework assignments (per week)	time for review and test preparation (avg. per week)	total study time (per week)
3 credits	1 to 2 hours	3 to 5 hours	2 hours	6 to 9 hours
4 credits	2 to 3 hours	3 to 6 hours	3 hours	8 to 12 hours

3 credits	2 to 4 hours	4 to 7 hours	4 hours	10 to 15 hours
-----------	--------------	--------------	---------	----------------

4

Place

Your answers indicate that having an identified, appropriate place to study is **not really a concern for you**. Review the resources below for helpful hints about how you can make your places of study most conducive to learning.

Here are some helpful hints about creating an appropriate place to study. (1) Find an environment that suits you. Some persons prefer silence and some prefer background noise. (2) Select a comfortable place, but not so comfortable that you will fall asleep. (2) Claim the space as yours. Inform others the space is your study area and they are not to disturb items or you while in the space. (4) Avoid common areas such as kitchen tables or den couches. (5) Avoid multi-tasking. While you are studying close your email and do not participate in social networking. (6) Feed your stomach then your mind. If you are hungry you may not be able to focus and may be tempted to take frequent breaks to snack. (7) Be supplied. Keep all of the supplies such as pens, paper and highlighters at your study space. (8) Have a bright idea. Make sure that your study space has appropriate lighting.

4

Reason

Your answers have indicated that you have **well defined, strong reasons for going to school**. Keeping yourself motivated with the goal in mind is important as you take your courses. You are encouraged to write down the ways that going to school will benefit you. Occasionally review this list to stay motivated.

Several research studies have shown that the more education a person has, the more annual income they generate and the better their quality of life. Today, a college degree is an essential ingredient. Employers frequently use degrees as a way to screen applicants. Then even after you get the job your salary may be reflective of your educational credentials. On average, a person with a Master's degree earns \$31,900 more per year than a high school graduate—a difference of as much as 105%! So keep yourself motivated and your eyes on the prize.

4

Resources

Your answers indicate that resources such as support from family, friends and your employer are **not much of an issue for you**. Consider yourself fortunate and write a letter of appreciation to any people who are being supportive of your decision to go back to school. Review the resources below for more helpful ideas on finding support for going to school.

To be successful, you really need the support of others and the appropriate resources. To make sure that you have access to the financial resources to continue your education, talk to the financial aid office at your school. If you are concerned about having the physical stamina, consider getting a physical exam from your doctor. If you have family or friends who can support you in ways such as childcare, have a discussion with them about your plans for going to school and express how you would appreciate their support. If appropriate, have a discussion with your employer. Ask if the company has an educational reimbursement plan and any policies regarding studying while on the job or during breaks.

3

Skills

Your responses to this section indicate that you have had some success in the past with academic pursuits, but you are **moderately concerned** about your academic success now. Think about what you did in the past to be academically successful. Were there certain study strategies or ways that you received assistance? If so, find out about all of the resources for academic support that your school currently provides. Many schools offer resources such as tutoring, writing support, etc. Review the resources below for more tips on being academically successful.

College is where you become more intelligent. You are not expected to be a genius to get in, just prepared enough to know how to work and willing to make the necessary sacrifices of your time and energy. Do you know how to study? Can you stick with a task until it is finished? Being successful in college is often as much attitude as aptitude.

Individual Attributes

This section measures six items: time management, procrastination, persistence, academic attributes, locus of control, and willingness to ask for help. These attributes can be enhanced or improved through academic interventions. Ask your faculty member or academic advisor about the resources for remediation and/or support which your school may provide.

The maximum possible score for this section is 100%. You scored a total of 74%.

Detailed Results

4

Academic Attributes

Academic attributes reflect your history of success with academic pursuits as well as your perceived ability to perform well academically. **Your prior academic history indicates that you should not experience academic challenges.** Keep up the good work!

3

Help Seeking

The Help Seeking category reflects your willingness to ask for help when you encounter a problem. It is very important that you seek help from the faculty member or other appropriate person when you are confused about the course content. **Your score indicates that you are moderately comfortable seeking help.** When you experience problems in your courses, do not waste time, but seek help soon.

3

Persistence

Persistence is a measure of your likelihood to finish what you started. **Your score indicates a moderate rate of persistence based on your prior experience.** During your courses you may have feelings of isolation or feel overwhelmed. At these times don't allow yourself to become discouraged and entertain ideas of dropping out. Hang in there!

3

Procrastination

Procrastination is putting off until tomorrow what could be done today. It is easy to delay starting work on assignments. **Your score indicates that you are somewhat likely to procrastinate.** You are encouraged to get started immediately on course assignments. Imagine how good it would feel to

complete an assignment early.

3

Time Management

Courses have differing expectations regarding attendance and/or participation. However, a significant amount of time is still required each week for reading course materials. **Your score indicates that time management could be a problem for you.** It is recommended that you carefully read the course syllabus, then get a calendar and plan the due dates for all of your assignments. Plan for a specific number of hours each week to work on course assignments.

3

Locus Of Control

Locus of Control is a measure of the degree to which you feel that you are in control of what happens to you. A person with high (internal) locus of control believes that their experiences are controlled by their own skill or efforts. **Your score indicates a moderate degree of locus of control.** This may leave you having feelings that regardless of your efforts, your grade will mostly be determined by how much the teacher likes you or just fate. You are encouraged to periodically discuss your performance in the course with your faculty member.

Learning Styles

People learn differently. Some people are very comfortable reading large amounts of text. Others are more comfortable listening to someone speak or writing things down for themselves. A person's preferred "learning style" is the approach to learning that feels most natural to them. It is based on a combination of their experiences, strengths, weaknesses, and preferences. Everyone has a mix of learning styles, and some people have strong, dominant learning styles. There are no "right" or "wrong" learning styles. Most people tend to adapt their learning style to the context of learning. With practice a person can strengthen themselves in the learning styles that are least comfortable for them. When a person recognizes the learning styles that work best for them, they can then make a better informed decision about the ways that they approach learning new things.

Your primary learning styles are Social, Solitary, and Visual.

About Your Primary Styles

- Social (interpersonal) – You feel most comfortable learning when you are surrounded by others.
- Solitary (intrapersonal) – When it is time to focus on a learning task, you prefer to be alone.
- Visual (spatial) – You seem to comprehend new information when you can see a picture or graphic to illustrate it.

Reading Rate & Recall

The average adult reading rate for English prose text in the United States is around 250 to 300 words per minute. Research shows that reading is around 25% slower from a computer screen than from paper. Thus you may slightly increase your results to find your speed when reading from paper.

Your on-screen reading recall was measured at 90% as indicated below

Your on-screen reading rate was measured at 190 WPM as indicated below

Reading Rate

Technical Competency

In order to participate in class, a student must have some way to get to the classroom. A student in a traditional class may drive a car on a highway to attend class, but a student in an online course "drives" a computer on the Internet (the Information Highway) to "attend" class.

The maximum possible score for this section is 100%. You scored a total of 100%.

Your score indicates that you have most of the basic skills needed to participate in your courses.

4

Computer Competency

Your responses indicate that you have considerable experience using your computer. Your computing skills will serve you well as you are continuing your education. However, there are always more things that you can learn to make yourself more efficient.

4

Internet Competency

Your responses indicate that you have considerable experience using the Internet. These skills will serve you well as you are continuing your education. However, there are always new and more powerful services becoming available on the Internet. You are encouraged to take the time to use resources such as <http://www.internettutorials.net/> which offers several free tutorials on using the Internet.

Technical Knowledge

The maximum possible score for this section is 100%. You scored a total of 75%.

Detailed Results

3

Technology Usage

You are quite organized and adept at using several technology applications. You will be able to use and sharpen these skills while taking your courses.

3

Technology in your Life

You are at a moderately high level of technology usage on this scale. Persons who regularly use several items of technology and who regularly complete tasks online will have the experience needed to be comfortable and confident taking courses. With this level of usage of technology in your regular routine you should be comfortable learning by using technology. However, try to stay informed about emerging technologies and learn to use them to your benefit.

4

Technology Vocabulary

You are at the highest level of technology knowledge on this scale. In courses some of the terms used on this assessment may be regularly used. You will be expected to know what the terms mean and how their meaning impacts your ability to learn. With your level of knowledge of technology information you should be able to excel in online or technology rich courses.

Personal Computer/Internet Specification

4

Do you own a computer?:
Your answer: Yes

It is good that you own your own computer. You are encouraged to make sure that your virus protection is kept updated and that you regularly back up your files.

3

Estimate how many years old the computer is which you will use to participate in your courses.:
Your answer: 3 - 5

A computer of this age should allow you to access your courses. However, some of the tasks in your courses may require additional software. At the start of each course, review the

course materials to ensure you have all required software and are prepared for your course work.

4

How do you connect to the Internet?:

Your answer: Network

You should not experience problems connecting to your online courses using a network connection. However, check with your Information Technology department to see if any firewalls exist which could be problematic.

4

What type of operating system do you have on the computer?:

Your answer: Windows 10

You should not have any problems accessing online courses with this operating system.
